

Paper Tubes

We meet industry standards ASTM D3078-94 for flexible packaging. Please contact your Inside Sales & Service Representative for further clarification.

1 Label Alignment

TOLERANCE OF $\pm 1/16"$

At label seam, the top and bottom edge may not line up perfectly.

2 Vertical Alignment

TOLERANCE OF $\pm 1/8"$

Artwork centering vertically on the tube.

3 Tube Seam Alignment

The seam of the paper tube will not specifically be aligned with the seam of the applied label, and can fall anywhere on the surface.

5 Color Tolerance

TOLERANCE OF 3 DELTA E

We use color matching software to help verify the press is calibrated for the correct color. In order to measure color accurately, we need at least .25" worth of solid area to target. We cannot measure color on patterns, gradients, Kraft, or metallic elements.

6 Quantity Tolerance

Paper tubes will be produced to the exact quantity ordered. There will be no shortages or overages in the quantity shipped.

7 Storage & Fill Conditions

40–80°F AT 30–60% RELATIVE HUMIDITY

Storage conditions and application temperatures outside of these ranges may affect label adhesion properties.
