

No-Code Workflows Digitally Transform the Way You Collaborate

End-to-end visibility Optimizes procurement

No-code workflows improve how enterprises build, deploy, and manage the procurement process. Realize 30-60% increase in speed-to-value by reducing low-value activities.

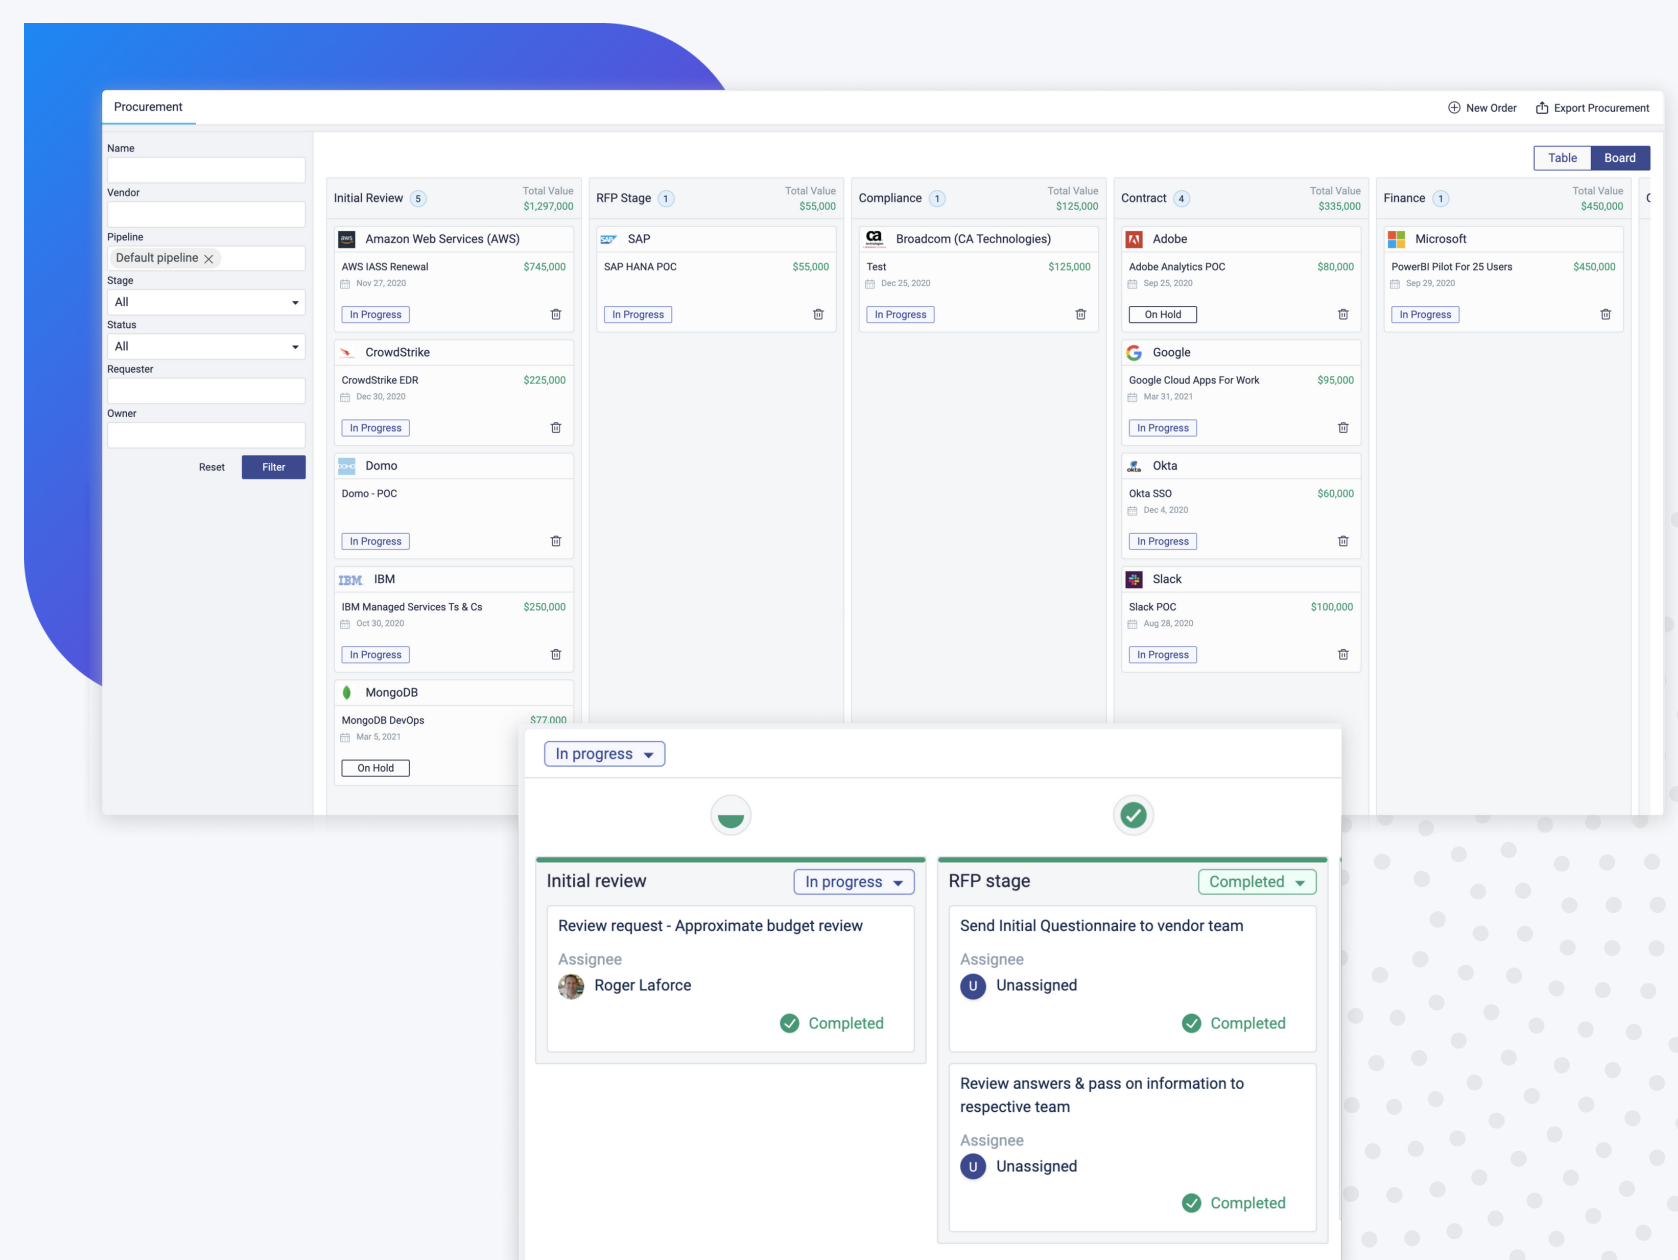

Build custom workflows tailored to your processes. Streamline the way you collaborate across departments to evaluate and manage demand.

Collaborate across all functions and departments

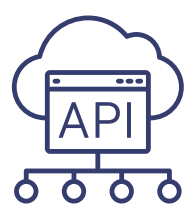

Benefits

Visualize your entire pipeline and bring IT, Procurement, and Finance together

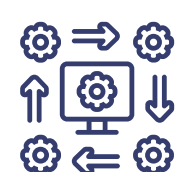

- **No-Code Workflows** - Drag-and-Drop interface builds workflows in minutes with no IT support
- **Rules Engine** - Use rules to auto-submit requests and auto-map to workflows
- **Workflow Collaboration & Alerts** - Automatically notify assignees and approvers on workflows & tasks with alerts
- **Pipeline Visibility** - Optimize investment planning by visualizing the entire procurement pipeline

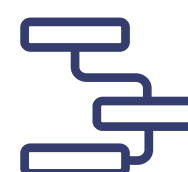

Capabilities

Seamlessly integrate with procure-to-pay systems like SAP Ariba and Coupa

No-code workflows for process specific customization and productivity optimization

Rules engine for automated workflow mapping and process configuration

No-code tools and easy automation is what is driving productivity in the workplace today. Terzo's platform delivers for procurement and for my team.

- VP of Procurement at Fortune 500 Software Company

About Terzo

Terzo empowers enterprises to unlock strategic opportunities hidden within their vendor ecosystems. Through its Vendor Relationship Management (VRM) platform, enterprises gain insights that allow them to drive innovation, improve governance, increase collaboration and optimize performance.
