

NORSEMAN[™]
PROTECTIVE SOLUTIONS

Fiercely Reliable[™]

EQUIPMENT PROTECTION

NOISE & DUST CONTROL ENCLOSURES

MAKE YOUR WORK ENVIRONMENT SAFER AND QUIETER.

You've got a job to do, but sometimes you're operating on a site that has sensitive acoustical requirements. Our in-house manufacturing capabilities and an expansive inventory of raw materials result in quick turnaround for cost-saving, customized Industrial Fabric Solutions.

Norseman's Noise & Dust Control Enclosures act as noise reduction barriers. Where hearing protection is required or your equipment is located near populated areas, Norseman's equipment enclosures can reduce the noise emitted by the machinery or process and protect your people and product by reducing dust emission from dry operations.

Norseman's Noise & Dust Control Enclosures are **GEAR2PERFORM**.

NORSEMAN, YOUR ONE-STOP SUPPLIER OF GEAR2PERFORM.

-  **On-Demand Supply:** Warehousing space and distribution locations across North America.
-  **Exceptional Service:** One-stop supplier of Fabric, Foam and Film Protective solutions.
-  **Superior Quality:** Manufacturing in North America since 1921.
-  **Extensive Experience:** Our Fiercely Reliable[™] team will find a solution to fit your business.

Contact Norseman or your local Sales Representative to order today.

NOISE & DUST CONTROL ENCLOSURES

SPECIFICATIONS

- Design to build, or modify an existing product.
- In-house designers assist with selecting the best material, hardware and manufacturing methodology to construct your product.
- Materials are selected to perform in whatever weather challenges you face. We use materials that perform from suppliers we trust.
- Framework is manufactured from HSS and other steel members that conform to CSA-G420.21 Grade 50W.
- Able to accommodate a wide variety of cutouts or roll-up flaps for equipment or personnel access.

DELIVERY & INSTALLATION

- Framework designed for easy installation and removal (pin-and-pocket system) on the existing structure, with no modifications required.
- Frame and fabric components can be designed to remain in place during transportation over short distances, or they can be easily removed (strap-and-buckle system) for shipping and storage.
- Pin-and-pocket system allows for quick installation without modifications to structures.
- All fabric components are labeled for easy identification and installation.
