

THERMAGUARD TG-250

WHETHER YOU'RE BUILDING A BRIDGE, A MASSIVE PLANT, OR STRUCTURES FOR THE OIL AND GAS INDUSTRY, YOU NEED A STURDY, DURABLE FOUNDATION THAT STANDS UP TO VARYING TEMPERATURES AND IS FLEXIBLE ENOUGH TO RESPOND TO ENVIRONMENTAL CONDITIONS.

Traditional void materials biodegrade or collapse under foundations, which could cause structural integrity damage.

Nordic Void ThermaGuard TG-250 incorporates all the benefits of Norseman's original **Nordic Void Form** while offering improved thermal insulation and enhanced weight-bearing capacity. Where cardboard or polystyrene void form only lasts for a single compression cycle, **TG-250** lasts for years.

Custom made to your projects specifications.

Norseman's ThermaGuard 250 is **GEAR2PERFORM**.

NORSEMAN, YOUR ONE-STOP-SUPPLIER OF GEAR2PERFORM.

THERMAGUARD TG-250

GEAR POINTS:

Outwork. Outperform. Overachieve.

Prevents thermal transfer, diminishes conductive heat loss, reduces heave.

Designed for resilience using closed-cell polyethylene foam. Holds up to frost heave and soil swell and remains stable over a range of temperatures.

Resists insects, vermin, moisture, mould, frost, bitumen, oil, hydrocarbon and diesel fuel.

Planks can be bonded to others to perfectly fit your project regardless of thickness or shape. Does not require protective OSB or plywood cover.

Strong, flexible polyethylene foam that withstands temperatures. Easy to use and maintains its durability.
