

TOP DRIVE SERVICE LOOP COVERS

MANAGE CABLES. PREVENT DAMAGE. AVOID DOWNTIME.

Avoid repair costs and downtime associated with service loop damage. Norseman's Top Drive Service Loop Covers keep service loops bound together, preventing hang-ups in the mast or damage from harsh weather conditions. They reduce stress on cables in service loops, which can help to lower maintenance costs.

Norseman's Top Drive Service Loop Covers are constructed with reinforced ballistic nylon fabric and designed to wrap around your service loop and power cables, keeping them together to prevent hang-ups in the mast and keeping cords organized. Constructed with a high-performance hook-and-loop fastener, they can be easily removed to inspect and maintain the service loop without removing the cover, reducing rig downtime. Quick and easy to install, Norseman's Top Drive Service Loop Covers organize power cables to keep them off the ground, protecting them from equipment and weather.

In stock, ready to ship from one of our distribution locations.
