INDUSTRIAL PRODUCTS

PIPELINE COOLING BLANKETS

PREVENT DAMAGED WELDS CAUSED BY RAPID COOLING.

Norseman's Pipeline Cooling Blankets gradually lower the temperature of welded metal pipes, preventing cracking and warping. They also serve as a protective barrier to keep your crews safe, protecting your teams from burning themselves.

Norseman's Pipeline Cooling Blankets are extreme protection for extreme weather. They minimize cracks during the welding of steel pipes by preventing them from cooling too quickly. Pipeline Cooling Blankets are fabricated with a canvas exterior and lined with 1" fiberglass insulation and glass cloth for superior heat protection. The elastic strap makes them easy to secure, and an S-hook ensures a tight fit to your pipes.

- Fabricated with a canvas exterior and lined with 1" fiberglass insulation and glass cloth.
- Glass-cloth temperature rating at 1,000°F (538°C).
- Easy to secure with elastic strap and S-hook for a tight fit to pipes.
- Available in two formats that come in standard and adjustable sizes. Both formats come in 9" and 12" widths, with varying lengths.
- Customized options available for specific project requirements.

In stock, ready to ship from one of our distribution locations.

Norseman's Pipeline Cooling Blankets are *GEAR2PERFORM*.

NORSEMAN, YOUR ONE-STOP SUPPLIER OF *GEAR2PERFORM*.

On-Demand Supply: Warehousing space and distribution locations across North America.
