

DESICCANTS

PROTECT YOUR CONSIGNMENT WITHOUT COSTING THE EARTH.

Protect your containerized goods from moisture damage with our **NEW Nordic Dry Desiccants**. With the leak-proof and maximum absorbent design, Nordic Dry Desiccants absorb humidity and prevent condensation in the ocean container so your containerized cargo of shipped goods will be delivered in optimal condition, free from moisture-related issues.

- **High absorption capacity:** Nordic Dry Desiccants contain a mix of calcium chloride (CaCl₂) and coco peat as a binding agent that allows for maximum absorption of water molecules.
- **Fast absorption rate:** Efficient reduction of humidity.
- **Leak-proof:** Nordic Dry Desiccants packaging is robust and stable.
- **Long lasting:** The Desiccants will still be working for you more than three months after activation, providing it has not reached saturation point.
- **Environmentally-friendly:** Unlike many of its competitors, Nordic Dry Desiccants are 100% biodegradable.
- **Non toxic:** Verified to be 100% non-toxic by the ALS Laboratory Service and specifically free of acrylamide. Approved for use in all transportation of food and agricultural products.
- Available in various sizes ranging from 375g to 2000g.

In stock, ready to ship from one of our distribution locations.

Norseman's Nordic Dry Desiccants are *GEAR2PERFORM*.

NORSEMAN, YOUR ONE-STOP SUPPLIER OF *GEAR2PERFORM*.

DESICCANTS

**Non toxic.
Eco-friendly.
Sustainable.**

Coco
peat

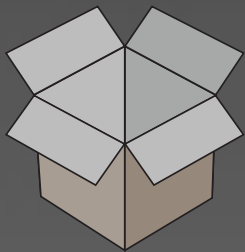

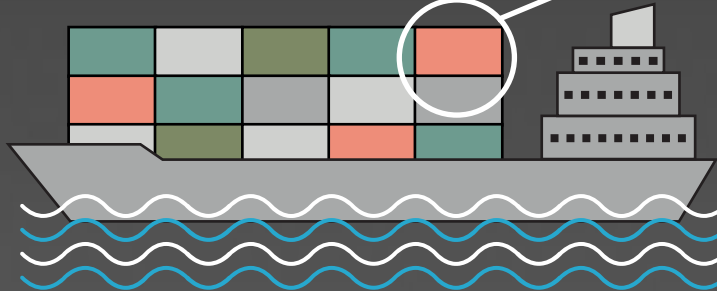

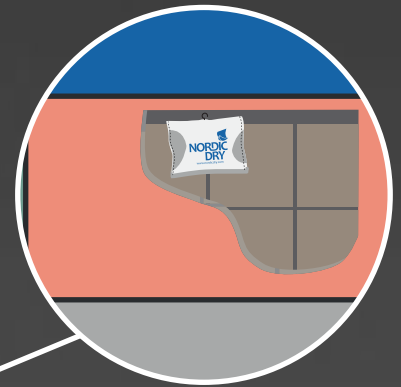

**Nordic Dry
Desiccant is made
from 100% natural
raw materials**

Calcium
chloride
 CaCl_2

*Trapped moisture and condensation
caused as a result of temperature
fluctuations during shipping can cause
damage to goods in transit. Nordic Dry
will absorb that excess moisture.*

*Goods arrive in perfect
condition, free from
corrosion, staining, mold,
mildew, fungus, caking and
the growth of bacteria.*

**Used Nordic Dry
product is 100%
recyclable**

*All plastic parts can be
fully recycled.*

*The calcium chloride (CaCl_2) can be washed
out and used as a path cleaner, while the
100% coco peat can be washed out for
use in oil and chemical absorption, as a
horticultural peat or for animal bedding.*

*Alternatively, the waste contents from
Nordic Dry bags can simply be deposited
in a wastewater stream, in which the CaCl_2
dissolves and the coco peat biodegrades.*
