

# Effortless Rapid Charging.

**blink**<sup>®</sup>

## **HYC 200**

200kW DC Fast Charging Station

The HyperCharger line stands out as the most compact and powerful solution. Capable of delivering up to 200kW and with integrated dynamic charging, the HYC200 ensures performance excellence.

### **ULTRAFAST • SCALABLE • DURABLE**

The Blink HYC200 DCFC is a compact and powerful charging solution capable of delivering up to 200kW of power to one vehicle or 100kW for two vehicles in parallel. The upgradable power of the HYC200, achievable thanks to the Hypercharger power-stack concept, allows it to be an innovative and scalable charging solution. The HYC200 is highly efficient and intelligent, featuring a wide output voltage range and integrated dynamic load management technology, making it suitable for a variety of charging scenarios and business needs.

#### **HYC 200 Charger Benefits**

- Up to 600A output current per charging system
- 500A per connector (prepared for 600A boost)
- 100kW power stacks for more user dedicated power sharing
- Wide output voltage range of 150V - 1000V
- Delivers exceptional efficiency, reaching an impressive 97%
- Intelligent system with integrated dynamic load management
- Parallel DC charging
- Scalable and upgradable power due to Hypercharger power-stack concept

#### **Product Details**

**Dimensions** 2235 x 420 x 663mm  
**Weight** 325 kg up to 462 kg
