

Charge Smart. Connect Confidently.

UNLOCK THE FUTURE OF EV CHARGING WITH THE BLINK NETWORK

A fully integrated EV-charging ecosystem that gives you **flexibility, control, and real-time insight** for your business.

ABOUT THE BLINK NETWORK

The Blink Network is a proprietary, cloud-based software platform designed for both hosts and drivers. With intuitive dashboards, remote monitoring, flexible pricing, and real-time data, you can confidently deliver an EV-charging experience that meets today's demands and anticipates tomorrow's opportunities.

For hosts:

Manage charger deployments, monitor station status, set pricing tiers, download usage reports, and optimize operations.

For drivers:

View charging speed, energy delivered, session duration, and estimated cost all via the Blink Charging app or integrated roaming apps, at home or on the go.

BLINK NETWORK: KEY FEATURES

- ✓ **Access Control & Visibility:** A modern host portal designed for greater visibility. Monitor chargers, access usage analytics, and stay informed.
- ✓ **Real-Time View:** See station locations, hours, pricing, and availability across your network.
- ✓ **Remote Access & Monitoring:** Diagnose, monitor and support charging stations remotely for enhanced uptime.
- ✓ **Flexible Pricing:** Define customized price-plans by user group or zone. Unlock new revenue-streams and manage demand.
- ✓ **24/7 Customer Support & NOC:** A dedicated operations center proactively monitors the network, ensuring constant support and action-tracking.
- ✓ **Seamless Driver Experience:** Thanks to roaming partnerships, drivers can access Blink's public charging via apps they already use.

BLINK NETWORK: WHY IT MATTERS

Today's businesses, property owners, and mobility operators face growing expectations for sustainability, service, and digital-first experiences. By adopting the Blink Network, you can:

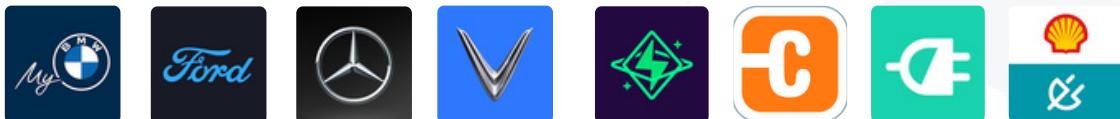

-  Attract and retain EV-drivers by offering reliable, visible charging infrastructure.
-  Enhance property-or-venue value by integrating EV-charging amenities into parking, retail, hospitality, or workplace assets.
-  Unlock operational insight through usage data and analytics – enabling smarter deployment, maintenance, and monetization.
-  Stay ahead in an evolving regulatory and consumer environment by deploying a future-ready charging platform.

BLINK NETWORK: ROAMING PARTNERS

Blink partners with a robust network of roaming providers to extend access for drivers beyond the Blink network. Through these integrations, drivers can:

- Locate and charge at Blink public stations using our roaming partners' apps.
- Use familiar apps and RFID cards for access to Blink charging stations.
- Enjoy transparent pricing and session tracking across roaming partner apps.
- Benefit from seamless roaming and reliable charging experience with their preferred partner app.
