

Change is hard, We're here to Help!

BP Pulse is switching off connections to the BP Pulse Platform for buyer-funded EV charging stations. Blink is here to help with your migration to the The Blink Network.

Take action before the 31st of December, 2025!

Global EV Charging Solution Provider

Over 17 years in business across 27 countries, Blink's customer focused development efforts have produced The Blink Experience, a comprehensive end-to-end service with expertise from initial project scoping and site assessments through ongoing EV driver and field support.

Why Choose Us

Deep Industry Experience

Blink Network has 5,000 publicly available, networked ports in the UK & Ireland with more than 120,000 ports globally.

Station Migration Experts

With over 18 AC & DC manufacturers already integrated with the Blink Network, we are here to make your migration process as seamless as possible.

Host-Charging Partnership

With Blink Migration, bring your hardware with you to The Blink Network. Over time as those chargers need maintenance and replacement, Blink offers clients the best hardware available to meet their specific needs.

Next Steps

Initial Consultation
