WE ARE WORLD-LEADING HEIGHT ACCESS AND FALL PROTECTION SPECIALISTS

We've been improving workplace safety since 2002. From designing the highest quality products and systems in the industry to providing all the specifications and details you need for safe installation and use, we're obsessed with making your height safety and access systems as simple, and as safe, as possible. Because when it comes to protecting lives, there are no shortcuts.

SAVING LIVES. IT'S WHAT WE DO.

This simple idea has guided every single thing we've done for over 20 years and it continues to guide us as we deliver industry-leading technology, expert advice, and innovative solutions to improve height safety around the world.

OUR GLOBAL REACH

NORTH AMERICA & CANADA

USA branch in Indianapolis, Indiana, with over 50 staff members.

Canadian distributor based in Ontario.

UNITED KINGDOM & EUROPE

Distributor located in United Kingdom, servicing all of UK and many European countries.

AUSTRALASIA

Three branches located across the eastern seaboard with over 160 staff. A full manufacturing facility location in Boronia, Victoria, and a warehouse in Sydney and Brisbane.

WHY WE ARE MARKET LEADERS

End-to-end product range designed and manufactured in-house.

We control all aspects of our product offering. The design, engineering, manufacturing, testing and quality. We are passionate about making simple, high-strength systems that will save lives.

Modular products that are the easiest to design, install and use in the market

Our customers' time is important to us. Our focus on modular design, and tools such as the Kattsafe Builda™ keep our designs and products simple, reducing the time spent designing, installing and using the system.

Unmatched technical knowledge and support

Our customers rely on us for best-in-class advice on any project, which gives them confidence in their installation, and project design. We are the go-to advisors in the height safety industry.

Full service offering with simple portfolio management tools

Our enterprise customers rely on us to provide maximum value when managing complete property portfolios. This includes ultimate compliance assurance, consistent solutions across all portfolios, control mechanisms for risk mitigation and cost value management with a fit for purpose design.

WE MAKE HEIGHT SAFETY SIMPLE

From the outset, we engage with our clients, scheduling regular meetings and undertaking advanced risk identification to pre-emptively identify and resolve potential issues. Working with architects and building owners, our design management team develops a solution which achieves the quality and functionality required by users, within the assigned budget.

Our highly cohesive approach encourages input throughout the process and aligns goals to ensure ultimate client and team buy-in to the final solution. Along the way we provide regular financial reports, understanding the rigorous internal validation required by our clients.

THE FULL KATTSafe SERVICE

1.

Product development and engineering

We develop products to be the simplest, most straightforward product for the buyer, installer and user.

2.

Product manufacturing

We manufacture and assemble our products in-house, with top-tier facilities and quality checks.

3.

Project design and documentation

We collaborate with architects, engineers and more, to develop a full height safety design package for any project, start to finish.

4.

Project management and assistance

Our team will manage the entire project process, from design, to production and delivery, and install.

5.

Approved installer network

We have a network of trained and approved installers across Australia and New Zealand.

6.

Unmatched technical advice and after-sale service

Our technical team have a combined 60+ years in the height safety industry, and know the answer to any technical question they are presented with.

“There’s no doubt that Kattsafe Australia offers the world’s safest and most advanced height safety systems.”

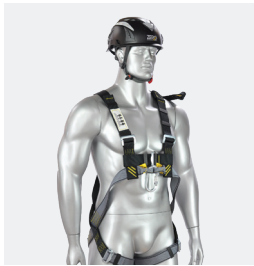

Jader Alves, Safe Rope Access

OUR PRODUCT RANGE

Commercial building height access and fall protection requirements

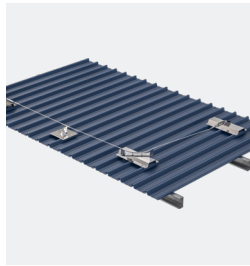

Kattsafe leads the industry in the design, installation and management of access and fall protection safety systems.

Harness gear

Anchor points

Static lines

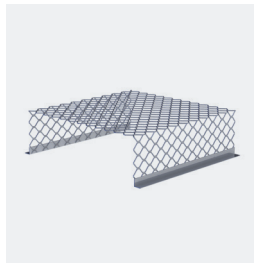

Rigid rail

Davits and needles

Guardrail and walkway

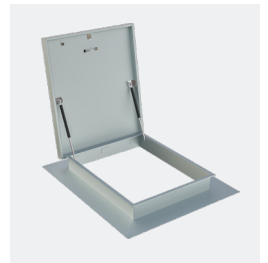

Skylight protection

Rung ladders

Fold down ladders

Roof access hatches

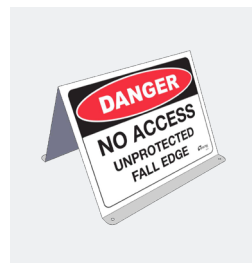

Step ladders and steps

Modular access systems

HVAC platforms

Hardware and signage

HEIGHT SAFETY IS IN OUR DNA

For more than 20 years, we have been leading the height safety industry, driven by our commitment to save lives.

We're proud to call ourselves a family business, not only for the three generations involved in the business but also for the team of over 160 staff and their families who we see as an extension of the family.

The entire Kattsafe team comes to work knowing that we are all making a difference to those working at height and we couldn't be more driven to continue giving it our best everyday.

IMPROVING HEIGHT SAFETY ACROSS EVERY INDUSTRY

Kattsafe products are purposefully designed to integrate seamlessly into virtually any industry, providing tailored height safety and access solutions that meet the unique challenges of each environment.

Whether it's construction, manufacturing, transport, infrastructure, defence, or commercial property, our systems are engineered to adapt, not the other way around. With modular designs, versatile mounting options, and compliance across a wide range of standards, Kattsafe ensures safety without compromise, regardless of the setting.

[View the industries we work with](#)

High-rise

The perfect solution to ensure effective and efficient rope access to your façades for maintenance and cleaning.

Data centres

Simple access to maintain high-security infrastructure and sensitive information.

Manufacturing and warehousing

High-strength lightweight systems for access to manufacturing and warehousing facilities.

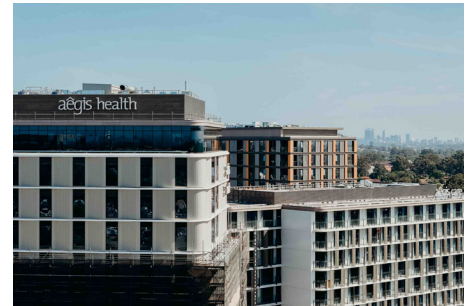

Defence

Keeping sustainment personnel safe while maintaining defence assets across the globe.

Water infrastructure

Fixed access solutions to access liquid storage tanks and water and sewerage treatment plants.

Heritage, public and health

We appreciate the intricacies of heritage and public building. Our systems can be retrofitted to existing structures and powder-coated to blend into the surroundings.

Transport

Providing access and fall protection for personnel performing regular maintenance of machinery.

Renewables

Safe access to inverter stations and other plant equipment on solar or green energy farms, and building roofs.

Temporary site access

Lightweight, modular access solutions for temporary access to site buildings and infrastructure.

QUAY QUARTER TOWER

Project: Quay Quarter Tower, Sydney NSW Australia

Installer: Rigcom Access

Challenge

2022's World Building of The Year, Quay Quarter Tower is an architectural feat, up-cycling 60% of the existing structure.

Major requirements with this project were to enable safe and easy rope access for maintenance and window cleaning to the façades and a glass replacement system.

Solution

With aesthetics at the forefront of this innovative building design, rigid rail was identified as the perfect choice when selecting a system to provide safe access to both the façades and the internal stair voids.

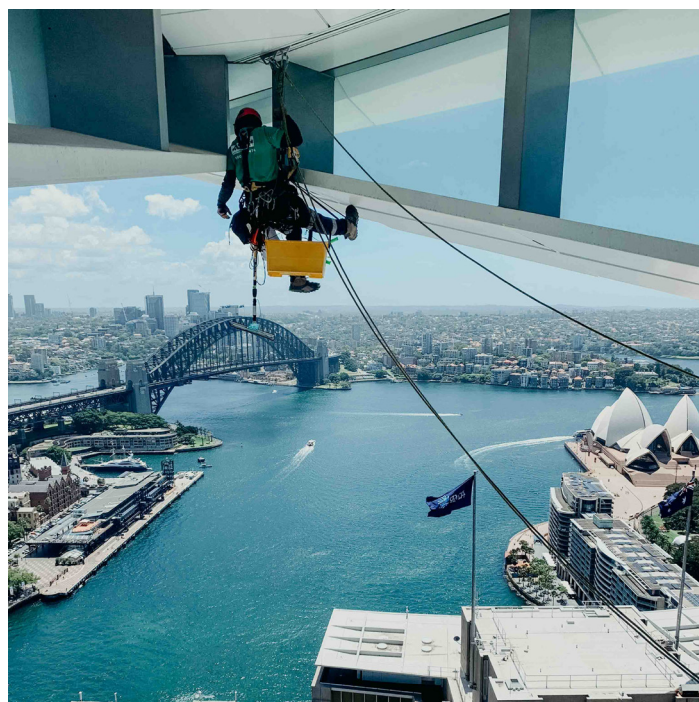

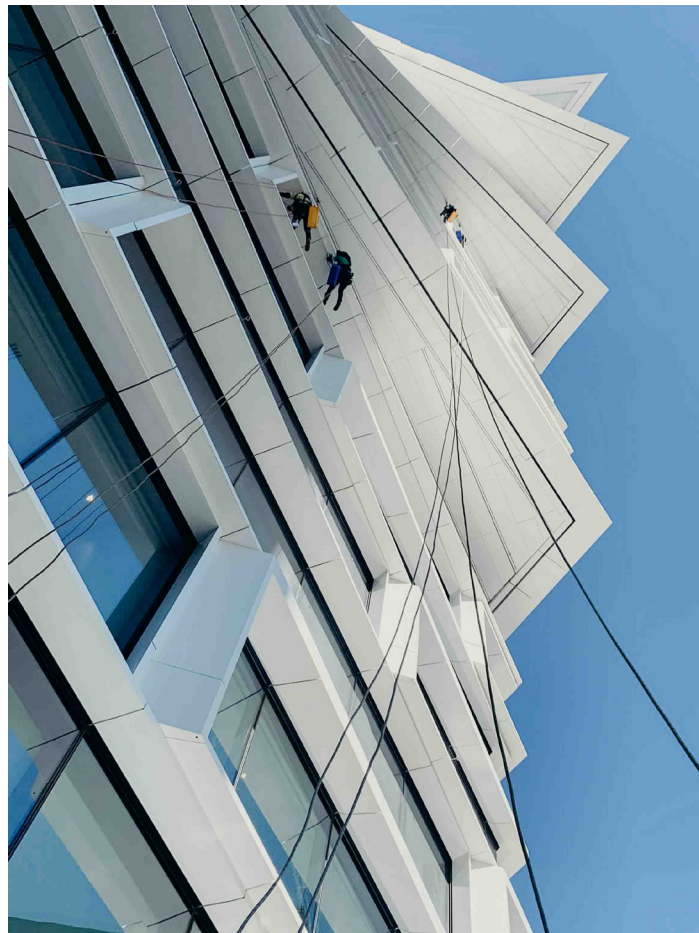

The unobtrusive design of Kattsafe's rigid rail provided the low visual impact that was in keeping with Quay Quarter Tower's clean architecture.

Products

Rigid 130 rail.

NEXTDC S3 DATA CENTRE

Learn more
View the project
case study

Project: NEXTDC S3 Data Centre, Artarmon NSW Australia
Installer: Karabiner Access

Challenge

One of NEXTDC's many Data Centres in Australia, the location in Gore Hill required safe and easy access up and around the mechanical plant and equipment on the roof, due to the high expected traffic for maintenance personnel.

The building also required a rope access solution to maintain the expansive facade.

Solution

Facade access was achieved by the installation of rigid 130 rail and rope access davits which offer excellent user capabilities and extremely low visual impact.

Further to this design aesthetic requirement, the rigid 130 rail was powder coated and matched to NEXTDC's specified colour.

Elevated walkways and stairs were designed by Kattsafe's in-house engineering team. The elevated walkways were manufactured to a custom width and the systems were able to be installed on site, requiring no hot works.

Products

Rigid 130 rail, davits, elevated walkway, stairs.

RAAF BASE, WILLIAMTOWN

Project: RAAF Base, Williamstown NSW Australia

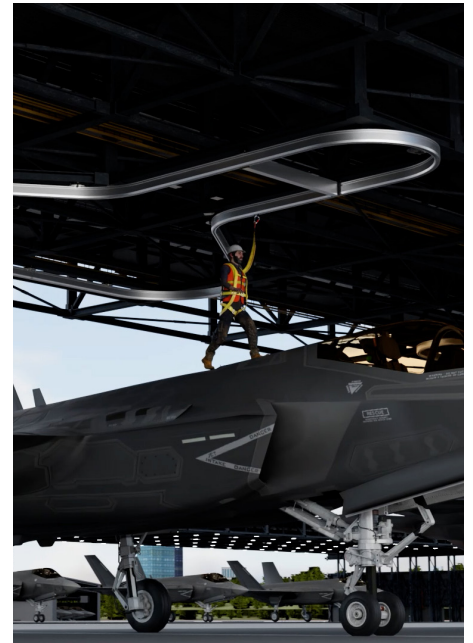

Installer: Marsh Height Safety

Challenge

RAAF Jet maintenance hangars can host multiple jets at one time, all needing a safe method for maintenance workers to access the top of the aircraft without the risk of falling from height.

At the Williamstown base, the system needed to follow the unique shape and design of one of Australia's most powerful defence machinery, the F35 jet, to avoid interruption in the workers path.

Solution

Designed for uninterrupted operation, our rigid rail 130 provides effective overhead fall protection for aircraft maintenance technicians with simple manoeuvrability to any area of the aircraft.

This seamless solution ensures efficient and safe completion of routine checks and repairs.

Products

Rigid 130 rail.

CHEMIST WAREHOUSE DISTRIBUTION CENTRE

Project: Chemist Warehouse Distribution Centre

Installer: Alti Access Australia

Challenge

Multiple conveyor belts, storage areas and production lines cover the floor of the Chemist Warehouse Distribution Centre, making transport throughout the facility a challenge for workers on foot.

They needed a system to streamline the foot traffic between locations.

Solution

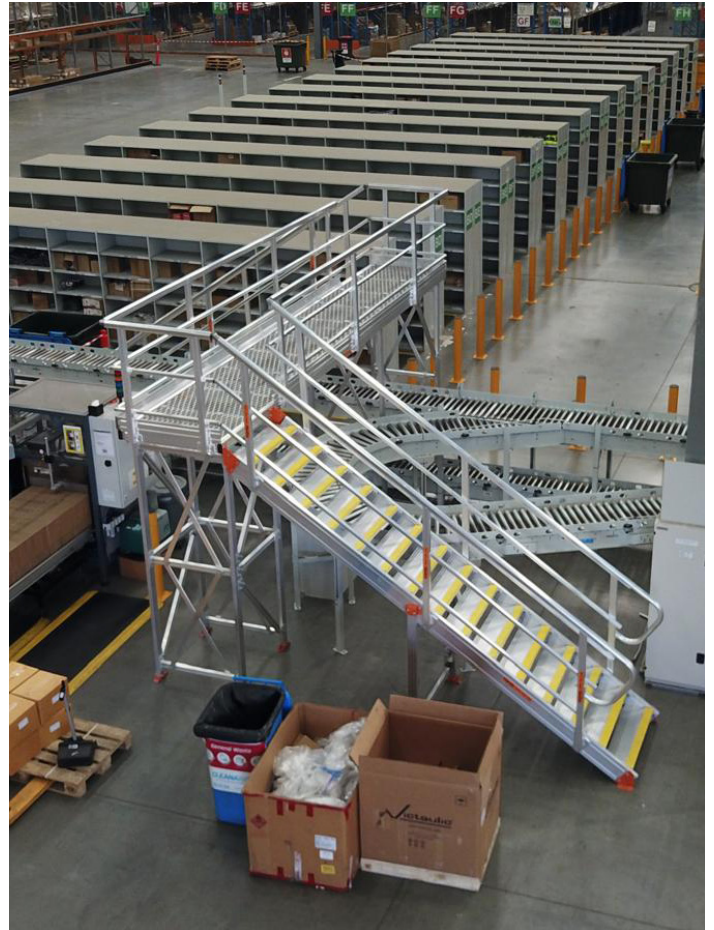

We worked with the conveyor manufacturer, Dematic, and Alti Access Australia to design a complete access solution for all areas of the warehouse.

Our modular stair systems were strategically placed to streamline movement across the facility, significantly reducing the time it takes for staff to get from one side to the other.

By enhancing access and flow, we're proud to contribute to a safer, more efficient working environment for warehouse teams.

Products

Elevated modular walkways, modular stair crossovers.

PROTEIN PROCESSING FACILITY

Project: L&G Meats Protein Processing Facility, Parwan VIC
Installer: Anchor Safe

Learn more
View the project
case study

Challenge

The large on-site tanks needed a high-strength access system to traverse easily from one tank to another. Workers also needed a smooth solution to view the tanks from above to conduct regular work tasks.

The size of the tanks proved a challenge for regular access systems, and the site required a fast and easy installation to ensure no time wastage for the facility.

Solution

Using the Kattsafe Builda, we configured several elevated walkway platforms to be installed using heavy-duty support structures which included various access solutions such as extra stairs and rung ladders for access to the varying levels required.

Multiple other areas of the facility required access systems, so steps and access platforms were installed around the site as well.

Products

Elevated modular walkways, rung ladders, steps.

CERTIFICATIONS, AWARDS & MEMBERSHIPS

Working At Height Association Gold Member

Kattsafe have been a WAHA member since 2002, and have been a gold member since 2023.

Victorian Premier's Design Awards Finalist 2024

Kattsafe rigid stealth rail was a finalist for product design excellence in 2024.

2024 Australian Good Design Award Gold Winner

Awarded for our rigid stealth rail for its demonstration in design excellence.

Triple ISO certification

Kattsafe have been a WAHA member since 2002, and have been a gold member since

Australian Aviation Awards Winner - Safety Innovator of the Year

Kattsafe rigid stealth rail was a finalist for product design excellence in 2024.

2024 Australian Good Design Award Winner

Awarded to our rigid stealth rail for being the one of the top five projects in each award category.
