

INTERNAL WALL MOUNT GUARDRAIL

GR31

PRODUCT OVERVIEW

The GR31 Internal Wall Mount Guardrail provides the highest level of passive safety for internal wall mounted applications. GR31 posts are positioned a maximum of 8ft on center. This system is sold in kit form to ensure all components are included for a seamless installation. Roof guardrail systems can be purchased by simply selecting the kit length(s) required, the number of corner kits, wall termination kits and ladder connection hardware kits. GR31 guardrail is simple and quick to install. This system can be easily customized on-site to suit specific site requirements.

Features

- Manufactured of high tensile aluminum
- Modular system facilitates infinite configurations
- Can be easily customized on site to suit application
- Lightweight for easy handling
