

MANUFACTURING INDUSTRY CAPABILITIES

WE ARE WORLD-LEADING HEIGHT ACCESS AND FALL PROTECTION SPECIALISTS

Simpler systems are safer systems. That's why we design and manufacture industry-leading, high-spec products for height safety and access systems that deliver maximum safety with minimum fuss. But 'good' is never enough for us and we continue to push the standards of safety forward with each innovation we develop.

We've been improving workplace safety since 2002. From designing the highest quality products and systems in the industry to providing all the specifications and details you need for safe installation and use, we're obsessed with making your height safety and access systems as simple, and as safe, as possible. Because when it comes to protecting lives, there are no shortcuts.

GO WHERE YOU NEED TO, SAFELY WITH KATTSAFE

Designed by industry-leading experts and manufactured using advanced fabrication techniques at our facilities around the world, every Kattsafe component, product, and system is designed to the highest specification for complete confidence that your people's lives will be protected.

Our high-spec components and products integrate seamlessly for modular systems that offer endless opportunities to create the safest solution possible. By using innovative components across multiple products and systems, we can customise our safety systems to suit any building or business around the world.

OUR PURPOSE IS SIMPLE: WE SAVE LIVES

Working at heights results in too many serious incidents every year and we know first-hand the devastating effects a fall can have. Everything we do is about reducing this number and getting workers home safe to their families each day.

Our vision is to be the world's most trusted height access and fall protection company, providing simple safety solutions that keep people around the world safe.

STAIR & PLATFORM SYSTEM

A proprietary modular system designed to allow on-site assembly and customization to suit exact site parameters, reducing design and delivery lead time.

Construction
Manufactured with lightweight aluminum components, ensuring corrosion resistance and aiding in a simple install.

Adjustable components
Allows components to be installed with basic tools and can be adjusted to suit on-site requirements.

T-bolt
M10 T-bolt fastener providing rapid installation to minimize any drilling required.

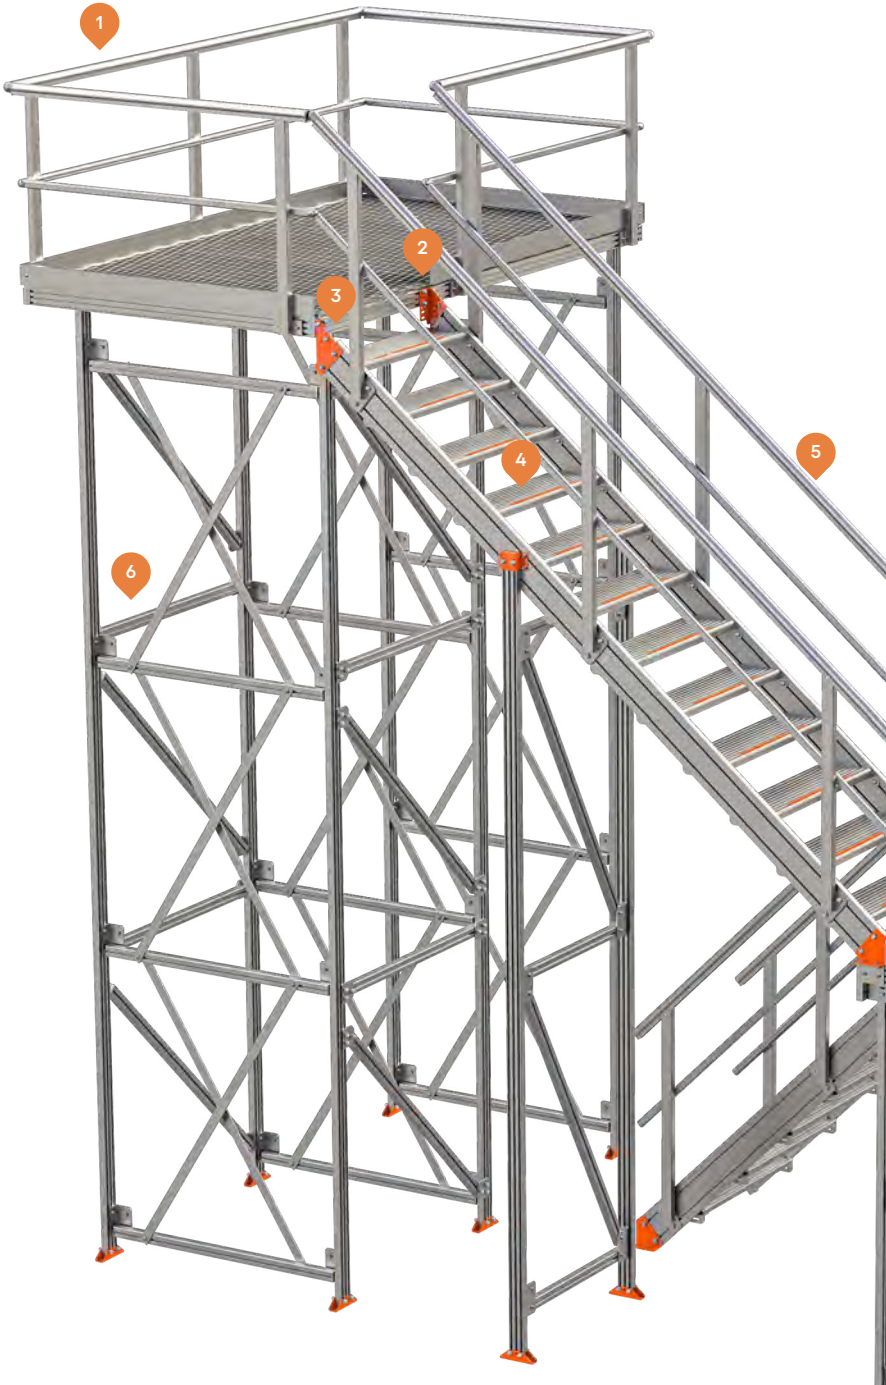

Load rating
Designed with a working load limit of 60psf and a 300lb point load. Can achieve up to 100psf for custom applications.

Pre-assembled
Supplied on-site as a flat-packed unit ensuring fast install times with less handling required than typical steel systems.

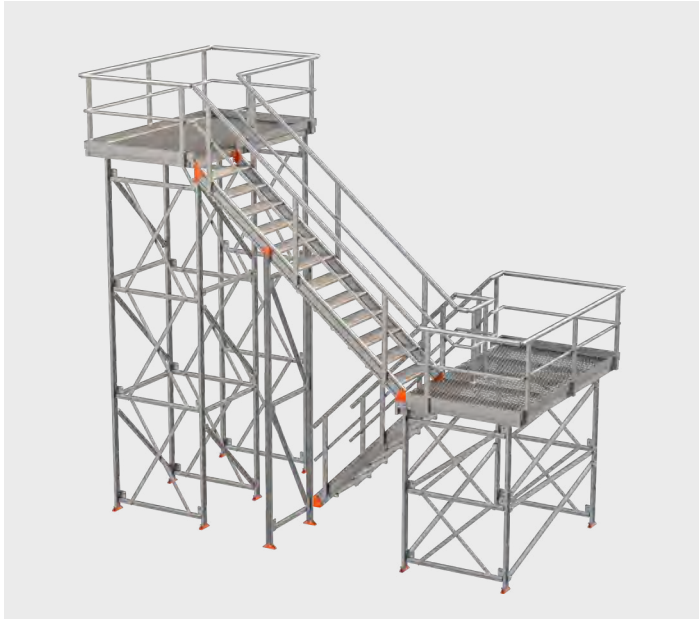

Self supportable
Additional bracing and spreader trusses allow the system to be self supporting where required.

SYSTEM CONFIGURATIONS

Stairs

Used for access up to 20ft in height with change in direction platforms. The adjustable stair treads allows flexibility of platform height to suit supporting structure.

Platforms

Used to provide access to machinery and elevated equipment for inspection and maintenance. The size and height is adjustable to suit specific site requirements.

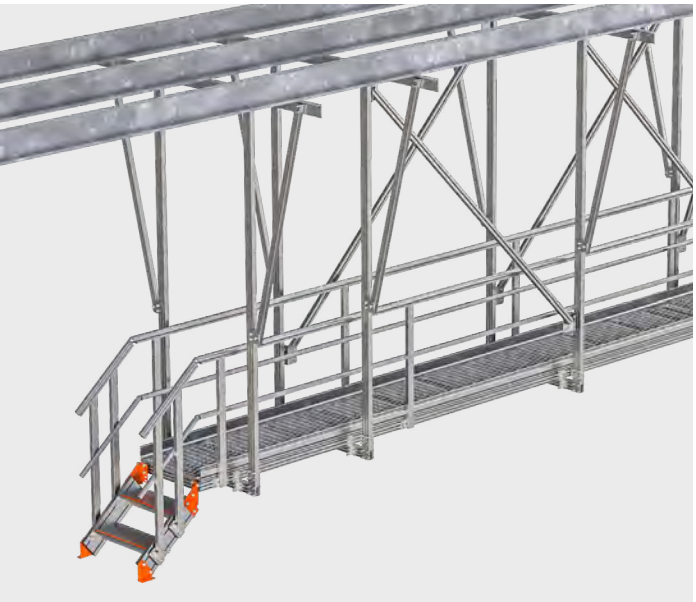

Crossovers

Used for access over ducts, conveyors and machinery. Stair heights are adjustable to suit specific bridge height, with modules of various bridge lengths.

Suspended walkway

Providing access above plant equipment and personnel or into internal ceiling spaces. It can be mounted to roof purlins or concrete and is suitable for drop heights of up to 20ft.

RESPONSIBLE SOURCING AND MANUFACTURING COME STANDARD

Our technical and in-house engineering teams are constantly innovating, designing, building and extensively testing all the products we sell. This is an integral part of who we are at Kattsafe.

Being able to source our materials and componentry in a sustainable and responsible way is crucial. Our aim is to reduce the amount of waste produced, re-purpose as much as we can and recycle items wherever possible, while working with ethical suppliers who meet our strict ethical standards.

It's all part of our no-shortcuts approach to creating the most advanced, high-quality height access and safety equipment.

LEADERSHIP TEAM

Every day our team goes above and beyond to deliver simpler safety solutions for our clients. From innovating new products to making sure every order is on time, we're proud to work with the best.

PROUD TO BE AMERICAN

As an American-owned and operated business, we work hard to ensure our products are made locally.

Our unwavering commitment to supporting and providing for local businesses across the country drives us to design, engineer, and manufacture our height safety solutions in-house. This ensures that we use only the highest quality materials and manufacturing methods when manufacturing and delivering our height access solutions.
