

Why Abstrakt?

1. Real-Time Recommended Responses are triggered in 0.2 seconds to help agents answer questions and handle objections.
2. Playbooks ensure agents are always compliant, secure every call, and never skip a step.
3. Combine automated scoring with manual QA for 100% coverage.

The details:

- Layer in your tech stack
- PCI/PII Masking
- Complete control of how long records of calls are stored for (*Ex: Delete audio after XX number of days*)
- Available in 125 Different Languages
- The system is configurable & ready to go out of the box
