

ACTIVITIES

HOW TO MAKE YOUR OWN SLIME

Ooey gooey, boo! Have some fun making homemade slime this Halloween.

WHAT YOU CAN USE

- 1 cup white school glue
- 1 tablespoon baking soda
- 1.5-2 tablespoons of contact lens solution (supply extra if needed)
- Food dye in colors of choice
- Pure Life® 8oz. bottles to drink

WHAT YOU'LL DO

- 01** Pour white glue and glitter glue into a mixing bowl
- 02** Add 1 tablespoon of baking soda and mix thoroughly until completely dissolved in the glue
- 03** Add a few drops of food dye to the mixture and stir until the color is evenly distributed
- 04** Slowly add the contact lens solution to the mixture — begin with 1.5 tablespoons and gradually add more as needed, while continuing to stir
- 05** You'll know the slime is forming when it pulls away from the sides of the bowl
- 06** Use your hands to knead the slime. If it's too sticky, add a bit more contact solution—a few drops at a time and continue to knead until it reaches your desired consistency
- 07** Store it in an airtight container until you're ready to use it
- 08** Drink festive Pure Life® 8oz. bottles as you play
