Non-Refundable Application & Administration Fee: \$150.00 (to be sent with completed application)

*Colorado 811 requires approval from facility owner/operator company being registered. If a 3rd party is registering and managing the membership, a direct contact person with the owner/operator company registering must be listed on the Receiving Information page of this application in addition to completing and signing this first page of application. If approval from the owner/operator is not obtained this application cannot be processed until registration approval is received, e.g., 3rd Party management firms registering Homeowner Associations require approval from HOA Board of Directors.

Colorado 811 needs the contact information you provide to us to contact you. Transactional messages sent to you are part of our ongoing services. It contains important information regarding your account, purchase, or activity with Colorado 811. Transactional emails are exempt from marketing opt-out requests under applicable regulations such as the CAN-SPAM Act, as they are necessary for facilitating a service or transaction you have requested. Additionally, Colorado 811 may use the contact information you provide to inform you about our products and services. You may unsubscribe from these communications at any time. For details on how to unsubscribe, as well as information about our privacy practices and commitment to protecting your data, please review our [Privacy Policy](#).

Applicant hereby acknowledges that once the Applicant is accepted for membership it shall have all the rights and privileges and is bound by the provisions relating to members as provided for in the articles, by-laws, and rules and regulations of the Utility Notification Center of Colorado (UNCC) DBA Colorado 811 (CO811), as the same exist now or may be amended from time to time. Applicant acknowledges that Colorado State Law 9-1.5-101 and the sections that follow require all owners and operators of underground facilities in the State of Colorado to be a registered member. If an underground facility is acquired by another organization membership with CO811 is non-transferable.

Please send completed application to CO811 Member Relations via e-mail to: member-services@co811.org

Membership fees can be paid by check or ACH/EFT. To pay by check, remit payment via US Mail.

Attn: CO811 Member Relations, 16361 Table Mountain Pkwy, Golden, CO 80403

UTILITY NOTIFICATION CENTER OF COLORADO
Fee Schedule
Effective January 1, 2025

Owner/Operator Membership Application & Administration Fee: \$ 150.00

Underground Facility Owner/Operator Members receive notifications of proposed excavation that are on or near the registered underground facilities and are billed monthly for these notices, according to the following fee schedule. Payment is due upon receipt and considered past due after the 10th day of the month following the billing cycle. Example: Billing for January is due by February 10th.

Please Note: New Owner/Operator joining as members will start and stay on a per regular transmission monthly billing schedule at a \$1.27 for the first several months of membership to allow CO811 to accumulate enough transmission volume data to appropriately sort a new member into a Billing Tier. In addition to the \$1.27 price for each regular transmission, a \$1.55 per positive response renotification transmission will also be due. Once an established transmission volume history has been determined by CO811, the new member will be assigned to their appropriate Billing Tier. For more information regarding Colorado 811 New Billing and Fee Schedule Model please visit <https://crm.co811.org/billingandfeeassessmentmodel>

Notification Message Fees:

Messages transmitted via electronic messaging (e-mail)	\$ 1.27
Identical messages transmitted to a second location	\$ 1.27
Positive Response Re-Notifications (known as Late Notices)	\$ 1.55
Cancellations	\$ 0.00

UNCC (CO811) accepts pre-payments for monthly invoices and will send a monthly statement showing the credit balance on the account. Colorado 811 accepts payments via check, money order, cashier's check, ACH, or EFT.

To setup ACH payments please email Member Relations Department at member-services@co811.org

Please direct all billing inquiries to accounting@co811.org

To pay by check, send payment for monthly invoices to:

Utility Notification Center of Colorado
P.O. Box 208903
Dallas, TX 75320-8903

Utility Notification Center of Colorado
P.O. Box 208903
Dallas, TX 75320-8903

To set up ACH payments please email Colorado 811's Member Relations Department
member-services@co811.org.

Member Notification Area Coverage Database

The member notification area database is the service area coverage of where the facility owner/operator member will be notified of proposed excavation based on the underground facilities being registered. It is the facility owner/operator members responsibility to maintain the notification area coverage database up to date. All changes to the notification area database must be submitted in writing, to include mail or e-mail to notify Colorado 811 Member Relations of the requested change. All change requests will be processed in the order they were submitted, by date.

To better serve member needs, the following timeline is recommended for providing updates to the notification area database:

- Digital data, to include GIS shapefiles and Google Earth files, should be submitted at least ten (10) business days prior to the date that member facilities require notification of proposed excavation for the geographic location. From the date CO811 receives the database update request, approximately five (5) business days are needed to complete the entry into the existing database. The member facility owner will be sent a validation form to approve changes and will be informed by e-mail when the update is complete. It is the members' responsibility to review and approve the notification area database. Contact Member Relations personnel for more information.
- Requests for copies of the existing notification area database coverage will require an e-mail sent to the Member Relations Department, member-services@co811.org
- Requests for notification area database updates, due to an emergency, will be accommodated in a timely manner with the resources and personnel available at the time of the request.
- A Database Validation Form must be signed and returned to confirm the accuracy and location of the digital data transferred from the GIS shape file into the CO811 system.
- All requests will be processed in the order they were received unless otherwise communicated by the member facility owner/operator of specific urgency.

Member Polygon General Information

The use of polygons is intended to redefine the member notification area database to a smaller notification quadrant. Colorado 811 requires a minimum buffer zone of 30 feet around registered facilities. When a locate ticket is processed there is a 150ft buffer applied to the excavation site creating a polygon. If the excavation site polygon intersects with the members notification area polygon your company will be notified of the locate request. The following explanation will assist CO811 members understand the receipt of a locate request that may be outside of the notification area quadrant.

- The use of a one hundred fifty-foot (150') buffer is standard with the polygon system for the excavation site.
- A minimum buffer zone of 30ft must be applied to registered underground facilities. A larger buffer zone may be requested by the registering member.
- A locate request ticket will be sent to the member if the buffer zone on the excavating site intersects with the buffer zone on the member notification area polygon.
- If a locate request is being processed in an area that does not have street information implemented yet, it will most generally need to be processed according to the directions that the caller provided. Estimating the location of a new street and attempting to select an excavation area without directions would not be an accurate way to process the locate request.
- If an excavator is requesting an extended area for utility locates or is not providing the best descriptive information for the locate request, the CO811 agent or online user is expected to ensure an adequate excavating site/area, to prevent possible damage. The CO811 agent or online user will then over-cover the excavation area.
- An excavator can still provide the township, range, and quarter section(s) information in addition to the descriptive information to be used for the request of a utility locate. CO811 agents and online users are coached, due to the procedure, to use that information to find the excavation area on CO811 maps.
- As of the above date, approximately 70 percent of CO811 ticket volume is currently being processed by Web Ticket Entry (WTE) online users. CO811 will continue to educate and provide mapping products to WTE users to improve their notification capability.
- All the above situations will result in the member receiving a locate request ticket notification. Please be reminded that CO811 is dedicated to providing the highest quality of notification information. The primary focus of damage prevention is to prevent injury and damage to underground facilities.

Member Notification Area Coverage – Mapping Files Format

CO811 Requirements for Importing ESRI Shapefiles for Member Notification Area Polygons

The Shapefile types supported are POINT, LINE and POLYGON. For POINT and LINE shapefiles, you must specify a buffer distance to apply to the file to create a polygon shapefile. A buffer is a radius of a point and/or a line. **Minimum buffer that can be applied to linear and radian polygons is 30ft and the maximum is 1000ft.**

Each Shapefile submission should be packaged in a ZIP file, with the following four (4) files at a minimum and sent via email:

- (1) ESRI Shapefile (.SHP)
- (2) ESRI Shape (.SHX) Index File
- (3) ESRI Shape (.DBF) Attributes File
- (4) ESRI Shape (.PRJ) Coordinate System File

****Shapefiles submitted must be in the coordinate system of NAD 83 LAT/LONG decimal degrees.**

Along with the data please include the following information about the data.

(A) Sender Information - Who is supplying the shapefile(s):
a. Name and contact information

(B) Member Code - The member code for which the notification areas will be applied to.

(C) Addition, Partial Replacement or Complete Replacement - The person sending the shapefile update must specify if the files submitted are an addition, a partial replacement, or a complete replacement of the existing notification area.

NOTE: For a partial replacement, the files submitted must contain the data for the entire county. If multiple counties are being replaced a complete replacement of the database is highly recommended.

(D) Effective Date - The date at which the notification areas will become "effective". You may specify that the notification areas be effective immediately or at some date in the future.

(E) Expiration Date - The date at which the notification areas will expire. You may specify that the notification areas expire NEVER or at some specific date in the future.

(F) Counties Covered - Which counties are covered by the submitted shapefile. This can be a list of one or more counties, or you can specify the entire state (i.e., any counties the shapes fall into.)

(G) Buffer Distance (in FEET) - If the shapefile being submitted contains point or line features, they will be buffered and converted into polygons. You must specify the buffer distance in feet for these types of shapefiles. Shapefiles containing polygons are assumed to already include the necessary buffers.

E-mail shapefiles to the Member Relations Department at member-services@co811.org

IMPORTANT NOTES AND LIMITATIONS:

(1) When shapefiles are imported into the mapping database, they are automatically clipped to the county or counties they intersect.

(2) Polygons are limited to 4 square miles in area. Polygons that are larger than 4 square miles will be partitioned into smaller polygons that cover the same area.

(3) Polygons which are made up of more than 9 points will be simplified.

(4) There is a maximum density limit of 16 polygons per quarter minute grid.

(5) In processing the importation of data, small gaps/holes less than 300ft in extent (width or height) will automatically be filled in due to the minimum buffer of 150ft of the dig site to limit complexity of the output.

Member Holiday Closures

Please complete and return this form to Colorado 811 via E-mail: member-services@co811.org

Company Name: _____

Member Code(s): _____

CO811 is CLOSED on the following Federal Holidays:

All member facilities are listed as closed on the following holidays and will receive afterhours courtesy calls.

New Year's Day
Memorial Day
Independence Day
Labor Day
Thanksgiving Day
Christmas Day

Mark an **X next to the remaining Federal Holidays if your company is closed.**

CO811 is OPEN: No normal tickets will be due on these Federal Holidays.

Martin Luther King Day ____
President's Day ____
Juneteenth ____
Indigenous Peoples' Day ____
Columbus Day ____
Veteran's Day ____

Mark an **X on the additional days below if your company is closed.** NOTE: Any dates selected below, and any additional dates listed on this form, CO811 is open, and ALL dates are legal "Mark By" (Locate By) dates. Member facilities listed as closed will receive an afterhours courtesy call.

Good Friday	____	Colorado Day	____
Day after Thanksgiving	____	Cabrini Day	____
New Year's Eve	____		
Christmas Eve	____		

If your company is closed on any additional days not listed, please list them here:

____ / ____ ____ / ____ ____ / ____ ____ / ____

- Mark by (Locate By) dates are NOT scheduled on Federal Holidays, except for emergencies and damages.
- The phone number Colorado 811 calls during holiday closures is the same as the afterhours number.
- If your organization is a non-participant for afterhours, you WILL NOT receive courtesy calls.

Member Positive Response

Positive Response is a Colorado 811 communication tool designed to provide better communication between the facility owner/operator member and the excavating community.

Colorado "One Call" Law, Title 9 Safety-Industrial and Commercial, Article 1.5 Excavation Requirements, mandates facility owner/operator members to provide Positive Response to the excavator through Colorado 811. In addition to the markings, the owner/operator shall provide for each of its underground facilities:

(A) Documentation listing the owner's or operator's name, the size and type of each marked underground facility AND,

(B) Documentation of the location of the underground facilities in the form of a digital sketch, a hand-drawn sketch, or a photograph that includes a readily identifiable landmark, where practicable.

If Positive Response is not provided by the facility owner/operator member by the "Locate By" date on the ticket, Colorado 811 will send an Automatic Positive Response Re-notification (delivered as a LATE ticket type) to that facility owner/operator member. Colorado 811 will continue to send re-notifications daily until Colorado 811 receives the Positive Response or 30 days after the locate by date, whichever occurs first.

Colorado 811 Facility Owner/Operator Members must post responses AND upload additional supporting documentation, as described in Colorado Revised Statutes, also known as the "Excavation Requirements" law, to the CO811 Positive Response System by using one of the methods listed below.

- CO811 Positive Response website at www.co811.org
- Positive Response link at the bottom of the ticket
- Rest API

Facility Owner/Operator Members have twenty-two (22) Positive Response selections to choose from. The responses will remain within the preset selections to accommodate the various types of reasons to communicate the outcome of a locate request.

All excavators providing an e-mail address, or a fax number, will automatically receive the Positive Responses from those members utilizing the Positive Response system the day after the "Locate By" date. If neither the email nor fax is listed the excavator can also access the Positive Response website to check responses at www.co811.org.

Should a member not respond to the CO811 Positive Response system, code "999" will appear on the locate request stating "MEMBER FACILITY HAS NOT RESPONDED TO COLORADO 811" to note that no response was made. The Positive Response codes are available at www.co811.org.

Contact Member Relations at member-services@co811.org to begin using the Positive Response system and begin posting responses to tickets.

As of January 1, 2021, all facility owner/operator members must include supporting documentation along with the Positive Response through Colorado 811 or the response will be considered incomplete.

Please sign to acknowledge the requirement to post Positive Response and provide additional supporting documentation to the person excavating through the Colorado 811 Positive Response system.
