

# Create a seamless off-street parking experience with Express Pay

Give customers a premium experience at your facility with the option to automatically start and stop their parking session without ever having to open their parking app.

## How does ParkMobile Express Pay work?

Express Pay uses compatible cameras and Automated License Plate Recognition (ALPR) technology to automatically recognize vehicles and manage parking sessions in gated and other off-street parking areas.

**1** Users register on the ParkMobile app and activate the automatic camera parking feature

**2** The system recognizes parkers at the lot or garage entrance and starts a session within the ParkMobile app

**3** The system identifies parkers as they leave, automatically opens any barriers, and processes payment via the ParkMobile App

### Get higher revenues & better experiences

- ✓ Leverage industry-leading ALPR cameras
- ✓ Boost visibility of off-street locations
- ✓ Support manual and automatic camera parking flows
- ✓ Improve ingress and egress times
- ✓ Drive revenue and reduce costs
- ✓ Tap into a combined network of users and locations

### Ready to learn more?

The ParkMobile App takes the best in digital parking innovation to simplify the parking experience and make our cities more livable.
