Low Power Consumption

Power consumption has been reduced by about 32%^{(1),(4)} compared to the current model.⁽²⁾

Contribution to SDGs

Made with lead-free brass, this fan complies with the RoHS Directive.⁽⁵⁾ It is also certified as an Eco Product⁽⁶⁾ for its use of environmentally friendly resources and technologies.

(1) For models 9LG0812P1G001, 9LG0824P1G001, and 9LG0848P1G001.

(2) Current model: 80 × 80 × 25 mm *San Ace 80L* 9LG type Long Life Fan (model no. 9LG0812P4J001).

(3) L10 expected life (L10 life: 90% survival rate for continuous operation in free air at 60°C, rated voltage)

(4) When operated to match the combined cooling performance of two current models (model no. 9LG0812P4J001).

(5) The RoHS (Restriction of Hazardous Substances) Directive restricts the use of certain hazardous substances in electrical and electronic equipment distributed within the European Union.

(6) Eco Products are eco-friendly products designed to reduce the environmental impact of the product and its packaging materials compared to our existing products or equivalent marketed products if not offered by us. Our products are assessed over the product's life cycle against our own eco-design requirements including product size, weight, power consumption, and CO₂ emissions, and those meeting our standards and higher standards qualify as Eco Products and Eco Products Plus, respectively.

PWM Input Signal Example

Input signal waveform

$$V_{IH} = 4.75 \text{ to } 5.25 \text{ V} \quad V_{IL} = 0 \text{ to } 0.4 \text{ V}$$

$$\text{PWM duty cycle (\%)} = \frac{T_1}{T} \times 100 \quad \text{PWM frequency } 25 \text{ (kHz)} = \frac{1}{T}$$

Current source (I_{source}) = 1.0 mA max. (when control voltage is 0 V)

Current sink (I_{sink}) = 1.0 mA max. (when control voltage is 5.25 V)

When the PWM control terminal is open, the fan speed is the same as the speed at 100% PWM duty cycle.

The PWM signal can be used with open collector or drain input.

Note that when using an open collector or drain input, or inputting a different voltage or frequency, the speed relative to the PWM duty cycle may differ from this specification.
