

A quick overview of your bill.

- 1 Quick-glance Amount Due and Payment Due Date.
- 2 Easy-to-read summary of your bill including the total charges from your last statement, payments applied, and the remaining balance along with the bill amount for the current month.
- 3 The account name and service address along with ways to pay and contact information for Customer Service. We also include the date range of your next meter reading so you know when your meter will be read and you can be sure we are able to get to your meter, if needed.
- 4 Use this information to compare how much energy you used this month to the energy you used during the last 12 months, along with other impacts to your energy use such as the average temperature outside and the number of days billed. This can help you understand your bill total and if there are any energy-saving actions you should take.
- 5 This section contains your meter readings and usage. We attempt to read your meter every month; however, sometimes the reading is estimated. To obtain your energy usage, we subtract the previous meter reading from the current reading. The current usage is then multiplied by the meter multiplier (typically 1) to obtain your monthly metered usage.
- 6 This section contains the calculations to arrive at the amount you owe for each energy service you have with us. Your total monthly usage is multiplied by your electric rate and added to any additional charges (see next page for complete descriptions of individual charges) to obtain your total current charges.
- 7 If you have outdoor lights, usage for those lights will appear here.
- 8 A breakdown of taxes and fees included in your bill.
- 9 If you are unable to pay the bill by the due date, a late fee is charged and is indicated in this section. The fee is based on the percentage of the current bill amount each month. Additional information about programs in which you participate also appear in this section.

Mailed 11/14/22 for Account # 0000-0000-0000

1 AMOUNT DUE **\$117.89** DUE DATE **12/12/22**

2 BILLING SUMMARY

The following line items can be found under the Electric Charges section of your bill (shown above).

All of these charges have been reviewed and approved by the Virginia State Corporation Commission. scc.virginia.gov.

- **Basic Service Charge** — A charge to help cover the costs of meter reading processing, service lines, and billing and payment processing. Calculated by multiplying the number of days in the billing period by the current basic service charge rate.
- **Energy Charge** — Composed of costs, such as fuel, that fluctuate with the production of energy, as well as a portion of fixed customer-related expenses not recovered in the Basic Service Charge. Calculated by multiplying the kilowatt hours (kWh) used by the current electric rate.

Note: When changes occur during your billing cycle, multiple line items may appear to reflect the distribution of the charges.
